

# Grow North Farm

EMPOWER EMERGING BUSINESSES

## What is Grow North Farm?

Grow North Farm (GNF) is an agricultural program that promotes wellbeing, expands food-access, and supports small-business development within refugee communities. New arrivals to Alaska are welcome to participate in the Fresh International Gardens co-op, a program of Catholic Social Services, where they can earn supplemental income, practice English-language skills, and access fresh vegetables. Grow North Farm also provides a space for agricultural entrepreneurs with refugee backgrounds to launch or grow their agriculture and food-based businesses.
